

Evaluate Custom Services

Customised solutions to help you access, analyse and manage the information you need to support effective decision-making.

CASE STUDY: [ACCESS](#) | [ANALYSE](#) | [MANAGE](#)

Forecasting volume demand of an API for a major global pharma company

Challenge

- The company was building business intelligence capabilities and looking to understand industry trends impacting its operations.
- The company needed an objective, data-driven analysis of forecast demand for key products to build into this initiative.

Evaluate Approach

- Proprietary Evaluate consensus forecast data and pharma business intelligence was mined for key data points.
- Findings combined with targeted secondary research.
- Consensus sales forecast figures were used as the basis to calculate forecast demand for specific active pharmaceutical ingredients.

Outcomes/Impact

- The client gained access to a detailed data-driven analysis of forecast volume demand based on a foundation of proprietary Evaluate content.
- The client received a customisable model for ongoing iteration and scenario planning, with an accompanying executive summary analysis drawing out the major findings.
- Key insights drawn from the analysis highlighted the major drivers of volume and value the company should incorporate into its business intelligence function.

Why Evaluate?

- Our services team work with you to translate your business challenge into key data needs.
- Proprietary Evaluate content, including consensus sales forecasts and drug pricing, underpins an evidence-based analysis of future volume demand across the industry.
- Robust analytical framework tried and tested with real-world client business challenges.
- Our industry experts rigorously stress-test the assumptions and variables driving your custom analysis to ensure it is fit for your needs.
