

EvaluatePharma®

Brazil Sales, Volume and Pricing

With ANVISA Approvals

Brazil Sales, Volume and Pricing

Gain competitive advantage with a comprehensive, timely and high quality source for Brazil sales, volume and pricing that includes hospital channels and reveals actual prices paid, mark-ups and government discounts.

Historically, it has been very difficult to access Brazil pharmaceutical pricing intelligence including reimbursed prices and discount information required to accurately assess the market.

Although available through government sites, Brazil pricing data is not user-friendly and is time consuming to analyse. For those requiring information in English, translation is required. Alternative ways to attain Brazil sales, volume and pricing market intelligence exist but involve using a combination of multiple data sources or by employing consultants. In addition, key data sets such as hospital channels and historic data may be unavailable.

Now through the EvaluatePharma platform, it is possible to analyse the Brazil market landscape by studying government sales, volume and pricing and ANVISA regulatory approvals in the global commercial context to make investment decisions, drive faster time-to-market, manage risks and optimise product performance.

Feature	Details
Comprehensive Government Sales	<ul style="list-style-type: none">• Aggregated, timely and fully transparent government contract (public sector) drug sales including hospital channels• Both Ministry of Health transparency portal and centralised procurement portal (Comprasnet), standardised and integrated for you• Includes volume & total sales
